

MOCHAMAD DHIAS ATH THARIQ

Front End Developer | Aspiring Fullstack Developer

+6285157065589 • mchmddiazz@gmail.com • Bandung, Indonesia • github.com/mchmddiazz • Portofolio: tamsdev.vercel.app

Web Developer with 5+ years of experience in the Shopify ecosystem (HTML, CSS, JavaScript, Liquid), accustomed to building and maintaining e-commerce features for enterprise clients. Currently deepening skills in React, Next.js, and back-end fundamentals (PHP, Laravel) through personal projects (including a portfolio at tamsdev.vercel.app) as part of a transition toward Full Stack Development. Comfortable working with Git/GitHub and Agile methodology.

PROFESSIONAL EXPERIENCE — WEB DEVELOPMENT

PT. Boleh Dicoba Digital - Web Developer

Sep 2019 – Feb 2025

Bandung, Indonesia

- Designed and customized client e-commerce websites using the Shopify platform and Liquid templating language, from the briefing stage through public release.
- Optimized website loading performance consistently to meet the platform's recommended standards.
- Built frozen/non-frozen shipment alert logic specifically for client Green Rebel Foods, tailoring the checkout flow to shipping operational requirements.
- Developed a custom jersey nameset product setting for Persebaya Store, enabling product personalization directly from the product page.
- Collaborated with the SEO team on landing page adjustments and ongoing maintenance for the Steak Hotel by Holycow! project.
- Carried out website redesigns based on Figma references, collaborating with the design team to maintain alignment between design and functionality.
- Handled technical troubleshooting and prepared problem-resolution documentation to speed up client issue resolution.

Easea.co - Freelance Web Developer

May 2022 (short-term project)

Bandung, Indonesia

- Optimized an existing website according to the agreed brief and design, focusing on speed improvements and minor bug fixes.
- Handled configuration and integration of third-party applications as part of the agreed scope of work.

PROJECTS

Personal Portfolio — tamsdev.vercel.app

2026 – Present

- Built a personal portfolio website using Next.js and TypeScript (.tsx) as a project to deepen skills in React and React Hooks outside of primary Shopify/Liquid work.
- Structured a modular component architecture (partial components for header and footer) as the foundation for a reusable page structure.
- Live and accessible at tamsdev.vercel.app — developed and updated on an ongoing basis alongside the process of learning Full Stack Development.

ADDITIONAL EXPERIENCE

Direct Sales — PT. XLSmart Telecom Sejahtera (Legacy Smartfren)

May 2025 – Apr 2026

Achieved top sales performer status for the Andir and Sukajadi area twice.
